User Guide: Task Management Application

Welcome to our Task Management application! This guide will walk you through the steps to use the app effectively, from user creation to managing tasks. Each user's data is stored independently, ensuring privacy and convenience. Follow the steps below to get started.

1. **Create an Account (Sign Up)**

- To begin, click on the Sign Up button located on the homepage.
- Provide the required information, such as your email and password.
- After submitting the form, your account will be created, and you will be logged in automatically.
- You can now start adding and managing tasks associated with your account.

2. Add Tasks

- Once logged in, you will see an option to Add Task.
- Fill in the task details (such as title and description) and click Save.
- Your task will be added to your task list and will remain stored under your account.

3. Edit Tasks

- To edit a task, locate it in the task list and click on the Edit button next to the task.
- Modify the task details as needed and click Save to apply the changes.
- Your updated task will be saved under your account.

4. Delete Tasks

- If you wish to delete a task, click on the Delete button next to the task in your task list.
- Confirm the deletion, and the task will be permanently removed from your list.

5. Logout

- To log out of your account, click on the Logout button in the header of the application.
- This will sign you out, and you will be redirected to the homepage.

6. Login as a Different User

- To log in with a different account, click on the Login button in the header.
- Enter the credentials for the new user and click Submit.
- You will be logged in, and the previous user's tasks will not be visible. Each user's tasks are stored separately, ensuring that your tasks are unique to your account.

## 7. Task Persistence Across Sessions

- The application ensures that your tasks are saved and remain accessible between sessions.
- Once logged in, any tasks you add or modify will be securely stored and available the next time you log in.
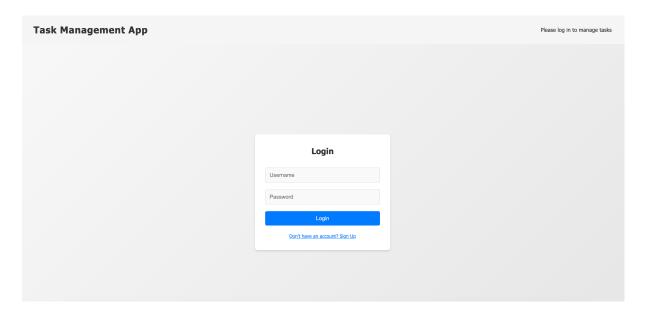

8. Multiple User Support

- You can create and manage multiple user accounts.
- When switching between users, tasks are segregated by user. Each user's task list is independent and stored separately, ensuring that there is no overlap between different accounts.
